Stavanger Engineering's core business is to create safe and cost-effective solutions within the oil & gas industry and the renewables market. We are friendly and environmental committed to our main focus areas:

- Zero harm to employees and stakeholders, our assets and the environment
- Delivering a quality that satisfies our customers
- Providing products and services fulfilling legal requirements as well as voluntary commitments as the minimum basis for our operations.

Health

We care about the wellbeing of our employees. Therefore, we aim to create a healthy work environment, both physically and mentally, with a good work life balance responding to the individual needs of our employees.

Safety

We are committed to make safety our absolute first priority. We will continuously work on strengthening our safety culture; while having strong focus on management's commitment to lead by example and on the safety behaviour of all employees. We believe that incidents can be prevented by approaching work and our design process proactively, making safety everyone's responsibility and by sharing knowledge and inspiring each other to find safer work practices and safe products.

Security

We will in order to protect our employees and our assets; constantly improve our preparedness to handle any foreseeable emergency situation, thus ensure the safety of our employees and minimise potential damages.

Environment

We will in our business activities strive to avoid harmful environmental impact and design environmental friendly products, while we contribute to sustainable development through sensible resource utilization, recycling and protection of the environment. We are committed to minimize influence on the external environment, works actively to meet established environmental goals based on identified environmental risks and aspects for our activities

Quality

We have a strong focus to deliver quality and reliability in solutions that meet our customer's expectations. Therefore, we constantly focus on improving our quality performance, reducing cost of poor quality and potential project risks and increasing the number of improvements. By these actions, our aim is to strengthen our customer satisfaction.

We promote a culture that continually improves our quality performance and our quality management system. We set ambitious objectives and targets for ourselves to progressively achieve a performance that we can be proud of and which adds value for us and all our stakeholders.

General Manager

Tomas Johnsen
